## EDUCATION & AWARDS

University of British Columbia, Vancouver

Sep 2020 – May 2025

3<sup>rd</sup> Year Bachelor of Science, Computer Science Major

- **Coursework:** Applied Machine Learning, Computer Hardware and Operating Systems, Intro to Computer Networking, Intro to Relational Databases, Intro to Software Engineering, Intermediate Algorithm Design and Analysis
- **Vantage One Entrance Award (\$25,000):** Granted based on academic merit

## TECHNICAL SKILLS

**Languages:** Go | JavaScript | TypeScript | Python | SQL | C++ | Java

**Databases:** PostgreSQL | Google Firestore | Microsoft SQL Server | SQLite

**Technologies:** React/Redux | Express | Koa | Docker | Git | Jira | AWS | Kibana

## WORK EXPERIENCE

Software Developer Co-op, Alida

Sep 2022 – Aug 2023

- Developed a data ETL tool using **Go**, **PostgreSQL**, **AWS SQS**, and **Kibana** to extract and transform data from multiple sources into an EAV data model, and load it to a data warehouse
- Constructed a data catalog API with **Go**, **Go-chi** to provide a simple and efficient way to retrieve data and metadata from the EAV model data warehouse
- Designed and implemented a robust API endpoint in **Go** utilizing **Go-chi**, **AWS SQS**, and **PostgreSQL** to enable data sentiment analysis using a sophisticated **large language model (LLM)**
- Implemented table-driven unit and integration tests with a generic test framework to ensure quality and maintainability of the ETL tool

Software Developer Intern, Felix Payment Systems

May 2022 – Aug 2022

- Developed onboarding and registration features for a client portal website according to its UI design prototype with **React**, **Typescript**, **Node.js**, **Express**, and **SQL Server**
- Configured CI/CD Pipeline for the client portal's codebase by setting up **Bitbucket Pipeline**, including writing unit tests with **Mocha** and **Chai**
- Assisted the development and design of a tap-to-phone payment mobile application with **QT Creator** by adhering to Figma mock-ups and business logics

## PROJECTS

GISAU Website | [www.gisaubc.com](http://www.gisaubc.com)

Oct 2022 – May 2024

- Led a team to design and develop a student association website using **React**, **Google Firestore**, and **Netlify**. Increased traffic by 146.8% to 2,700 visits.
- Developed a gamified Pomodoro timer with **React**, **Express**, **Node**, **Auth0**, and **Firebase**, boosting user engagement and loyalty through reward points redeemable for club's merchandise and event tickets.
- Developed an online polling tool with **React** and **Google Firestore** for the club's annual election to eliminate the needs for manual validity checking. Successfully managed 80 responses and provided real-time data upon completion

Indeed Jobs Scraper | <https://github.com/chrishadrian/jobs-webscraping>

Feb 2022 – Apr 2022

- Developed a web scraping script with **Python**, **BeautifulSoup4**, and **SQLite** to extract job listings and their descriptions from Indeed to automate job search

Unixpense | <https://github.com/chrishadrian/Unixpense>

Sep 2021 – Dec 2021

- Developed an expense tracker desktop application with **Java**, **JUnit**, and **Swing** that allows users to create, delete, save, load, and analyze their expenses
